### The European Union

The European Union rose out of the ashes of World War II, as six European nations merged their coal and steel industries—both central to war-making capability—in an effort to establish close economic ties and prevent future conflict. Today's EU is a unique economic and political partnership among 28 diverse democracies united in their commitment to peace, democracy, the rule of law and respect for human rights.

The EU seeks to uphold these values in Europe and beyond, to build and share prosperity, and to exert collective influence by acting together on the world stage. As a major economic and commercial power and the world's biggest donor of development assistance, the EU's influence stretches far beyond its physical borders. In cooperation with partners like the United States, the EU works to achieve a more secure and peaceful world and to tackle global challenges ranging from poverty to disease to terrorism.

\* Source: Eurostat (2012 estimates)

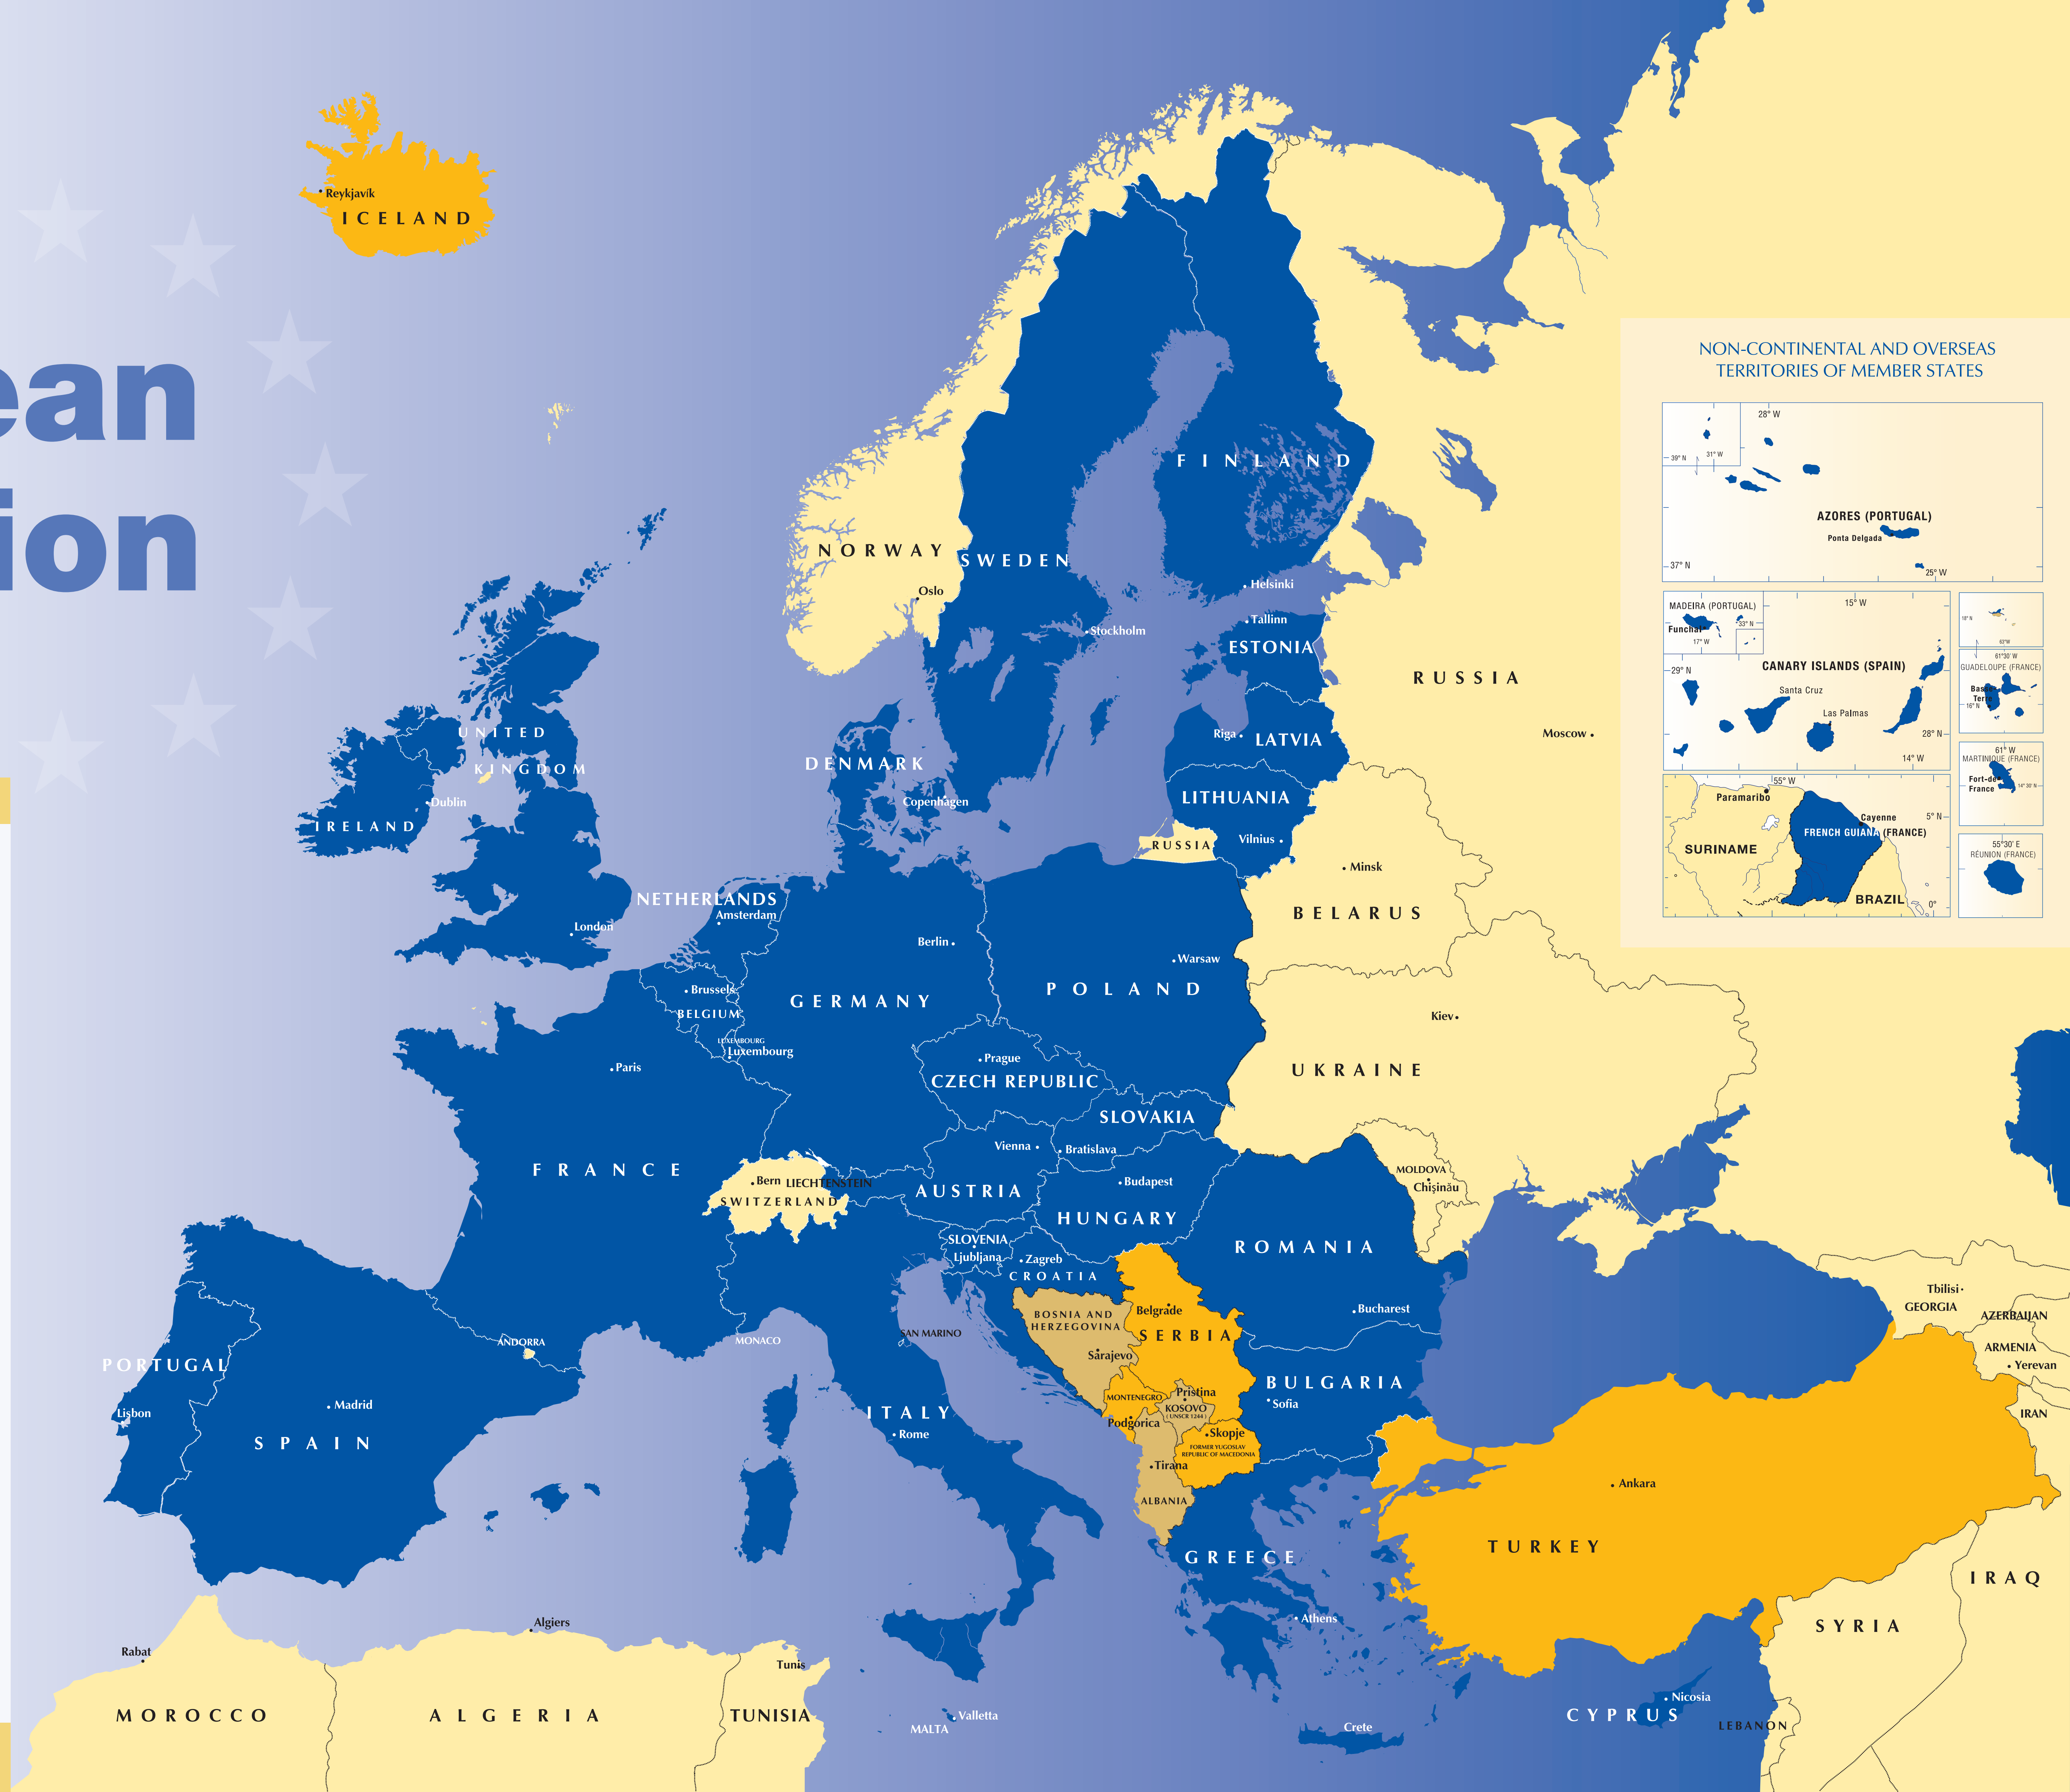

\*\* Source: World Bank Development Indicators. GDP per capita is gross domestic product divided by midyear population. GDP is the sum of gross value added by all resident producers in the economy plus any product taxes and minus any subsidies not included in the value of the products. It is calculated without making deductions for depreciation of fabricated assets or for depletion and degradation of natural resources. Data are in current U.S. dollars (2011).
